SUMMARY

Final-year (4th-year) Computer Engineering student currently studying at **WSB University (Poland)** via the Erasmus+ Exchange Program. Experienced in building cross-platform mobile applications with **Flutter, Dart, and Firebase**, and engineering local generative AI pipelines in **Python (PyTorch, ComfyUI, ControlNet, AnimateDiff)**. Proven track record of shipping commercial mobile software to the Google Play Store, contributing to open-source Java repositories, and delivering C++/Unreal Engine multiplayer systems. Seeking remote Software, Mobile, or AI Engineering roles.

TECHNICAL SKILLS

Mobile & Frontend: Flutter, Dart, Provider (State Management), Material Design, HTML5 Canvas, CSS3, Tailwind CSS, JavaScript
AI & Computer Vision: Python, PyTorch (CUDA), ComfyUI Workflows, AnimateDiff, ControlNet (Lineart/Depth), Local Diffusion Pipelines
Programming & Game Engines: Java, Python, Dart, C++, C#, JavaScript, x86 Assembly, Unreal Engine 5.3 (C++/Blueprints), Unity
Backend, Cloud & Tools: Firebase (Auth, Cloud Firestore, Storage, Cloud Messaging/FCM), Microsoft SQL Server (MSSQL), Git, Gradle, REST APIs

EXPERIENCE

Mobile Application Development Intern — Talos Yazılım (Istanbul, Turkey) Jun 2026 – Jul 2026
- Implemented mobile UI component refinements, responsive screen layouts, and transition animations to improve user interaction flows.
- Diagnosed runtime defects using debugging and profiling tools, documenting root-cause analyses and resolving UI/state bugs across test builds.

Founder & Independent Mobile / Game Developer — YOM Games (yomgames.com.tr) Jan 2026 – Present
- Developed and published **Rhythm Box** (Google Play Store) using **Flutter** and **Firebase**, engineering a custom audio-rhythm synchronization loop and cloud-backed player data persistence.
- Built and deployed the studio's bilingual (EN/TR) web platform (yomgames.com.tr) using Tailwind CSS and asynchronous JavaScript endpoints for contact and newsletter management.

ENGINEERING PROJECTS

AnimeAI Studio — Video-to-Video AI Engine | Python, PyTorch, ComfyUI, AnimateDiff, ControlNet, JS github.com/Samrili/animeai
- Architected a dual-workspace local generative AI application combining a **ComfyUI** backend (*AnimateDiff*, *ControlNet Lineart/Depth*, *ToonYou*) with a custom bilingual web interface (*RingPulse AI Studio*) for frame-accurate video-to-anime synthesis and automated poster generation.
- Built an interactive **HTML5 Canvas region-protection masking tool** allowing users to paint brush/rectangle masks that preserve facial details, brand logos, and typography during diffusion inference.
- Engineered a hardware-aware launcher (`smart_launcher.py`) that detects GPU VRAM capacity (4GB to 24GB+) and dynamically assigns runtime memory flags (`--lowvram`, `--highvram`) to prevent CUDA Out-Of-Memory crashes.

AvukatBul — Legal Consultation Mobile App | Flutter, Dart, Provider, Firebase (Auth, Firestore, FCM, Storage) github.com/Samrili/AvukatBul
- Developed a role-based (Client & Lawyer) cross-platform mobile application in **Flutter** utilizing `Provider` state management, custom Firestore security rules (`firestore.rules`), and modular service layers.
- Implemented location and city-based lawyer search, real-time one-on-one chat messaging, consultation package purchasing, case tracking, and verified user rating workflows backed by **Cloud Firestore**.
- Integrated **Firebase Authentication** (Email & Google Sign-In), profile/document uploads via **Firebase Storage**, and push alerts using **Firebase Cloud Messaging (FCM)** and `flutter_local_notifications`.

Tall Enough — Co-op Multiplayer RTS Game | Unreal Engine 5.3, C++, Blueprints, Steam SDK github.com/Samrili/Tall_Enough
- Built a 2-player cooperative strategy and island micromanagement game featuring Steam Listen-Server and Dedicated-Server network replication.
- Programmed procedural seed-based island generation, AI behavior trees, an interactive blacksmith upgrade system, game-speed controls, and UI localization.

K.A.R.M.A — 2D 1-Bit Platformer (5th Place, 2026 Karadeniz Game Jam) | Unity, C# 2026 Karadeniz Game Jam
- Co-developed a complete 2D 1-bit platformer from scratch within a strict 48-hour deadline in a 2-person team, placing **5th overall** among competing teams.

ProjectE-Integration — Open-Source Mod Compatibility | Java, Gradle, NeoForge github.com/Samrili/ProjectE-Integration
- Analyzed and debugged cross-mod recipe conversion mappings in an open-source Java codebase (~300KB source), resolving compatibility issues for Minecraft 1.21.x.

EDUCATION

WSB University (Akademia WSB) — Sosnowiec, Poland Jul 2026 – Present
B.Sc. in Computer Engineering — Erasmus+ International Exchange Program (4th Year / Senior)

Ardahan University — Ardahan, Turkey Jun 2023 – Expected Jun 2027
B.Sc. in Computer Engineering (4th Year / Final-Year Undergraduate)

CERTIFICATIONS & LANGUAGES

Certifications: Networking Basics (May 2026) — TCP/IP protocol suite, routing fundamentals, and OSI reference model architecture.
Languages: Turkish (Native / C2) • English (Upper-Intermediate / B2–C1 Working Proficiency) • Japanese (Elementary / A2) • Polish (Beginner / A1)

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 (GDPR).
